# REAL FASHION ADVICE FROM FAKE BITCHES

Make a **black and white**  
zine that **makes up**  
fictional versions of  
fashion advice

i took a lot of creative liberties with this idea. it's not black and white but it's monochrome. close enough. these fictional characters rarely give fashion advice but like imagine this was a fashion magazine made by someone who knows nothing about fashion.

introducing fake bitch #1: interview (?) with

## the vampire lestat

73 questions from vogue but like way different because there's less questions and i'm not vogue

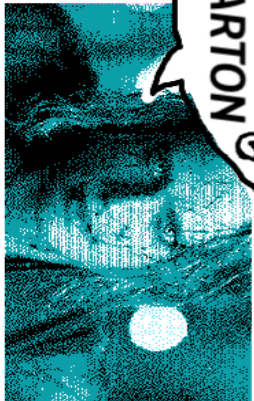

what's your favorite time of day?  
when it's not, obviously. what's one vice you wish you could give up?  
i don't believe in denying myself the pleasures of life. i'm not catholic. if you could raid one woman's closet who would it be?

what's a movie that made you cry?  
i watched a plastic bag drift through the wind and it made me weep  
if you could give your readers some fashion advice, what would it be?

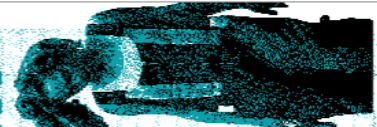

take your phone and throw it into the nearest body of water. sir! is your enemy, and for the love of everything that is good in this world, iron your clothes.

thanks lestat.

## BART

my favorite things to be added onto other things to make them more useful are flannels and other shirts that are too big for me so i can wipe all the blood off. i don't like when my hands get slippery; guns are too louds i like knives to slash quick and easy. chainaws are nice to carry during halloween because no one questions me. overallly pants are my favorite because i love how many pockets they got. what are you doing with this information? you never told me your name. can i kill you now?

i love bart more than any one ever

idk it's just a trend  
do i really need to dump everything out?

yes.

(one phone for each boyfriend)  
MINT SLR-670i. Polaroid SX-70 Film camera... every shot counts!  
(name redacted, lol)  
lots of polaroids... all candids of with dates written on the back of each picture. how sweet!  
a large knife. for self defense? talk about old school....  
a lock picking kit.  
bobby pins just don't work on these new-age locks anymore
